

## Specialized devices and installations

### Installations and devices for examination of ID documents, banknotes, securities and other documents

Cappelen Bulgaria offers complete product solutions for precise document examination. Its wide range of devices includes portable and easy to operate machines as well as complex laboratory systems with extremely high technical specifications and special software modules.

The examination of a document's authenticity is a complex task. The numerous security elements used for the optimum security insurance of a document therefore require not only expertise, but also a wide range of light sources and illumination methods. The precise optics and filters in combination with various comparison techniques allow for the detailed examination of different kinds of documents including passports, banknotes, securities, security paper etc.

Cappelen Bulgaria offers individual configuration of the devices according to the requirements for examination of a document, allowing fast and effective processing and convenience for the operator.

### Forensic devices

Cappelen Bulgaria is an official representative of world-known manufacturers in the area of specialized systems and devices in accordance with the needs of ballistics and criminology. The state-of-the-art machines are based on the latest developments and innovations in the area of forensic technology and provide the most modern capabilities for thorough examination and analyses. The machines are appropriate both for investigations on the crime scene and preserving evidence for laboratory analysis.

Cappelen Bulgaria offers a wide range of specialized systems for print inspection, discovery, collection and examination of fingerprints, analysis and comparison of fired ammunitions, specialized chambers for evidence collection, precise inspection of ID documents, banknotes and security paper.
